About the Book	V
Contributors	VII
Editor's Preface to the 3rd edition.....	XI
1 Molds for Various Processing Methods.....	1
1.1 Injection Molds	1
<i>P. Wippenbeck</i>	
1.1.1 General	1
1.1.2 Injection Molding Process	1
1.1.3 Design of the Molded Part	7
1.1.4 Basic Mold Structure.....	9
1.1.5 Types of Ejection.....	10
1.1.5.1 Products without Undercuts	10
1.1.5.2 Products with External Undercuts	13
1.1.5.3 Product with Internal Undercuts.....	17
1.1.5.4 Products with Internal Threads	19
1.1.6 Gate Technology	21
1.1.6.1 Gate Design	21
1.1.6.2 Solidifying Runner, Remaining at the Molded Part	23
1.1.6.3 Automatically Separated Runner.....	26
1.1.6.4 Pass Through Channels	29
1.1.6.5 Hotrunner Molds.....	31
1.1.6.6 Hotrunner Nozzles	34
1.1.7 Venting of the Cavity.....	37
1.1.8 Temperature Control	39
1.1.9 Special Designs.....	41
1.1.9.1 Stack Molds	41
1.1.9.2 Injection-Compression Molds.....	43
1.1.9.3 Multi-Component Technology.....	44

1.1.9.4	Outsert Technology	48
1.1.9.5	Molds for Thermosets and Elastomers	49
1.2	Compression and Transfer Molds	52
	<i>J. Berthold</i>	
1.2.1	Introduction	52
1.2.2	Compression Molds	53
1.2.2.1	General Information.....	53
1.2.2.2	Requirements.....	55
1.2.2.3	Components of a Compression Mold.....	56
1.2.3	Transfer Molding	56
1.2.3.1	General	56
1.2.3.2	Requirements.....	57
1.2.3.3	Structure of a Transfer Mold.....	57
1.2.4	Making Compression Molds	58
1.2.4.1	Machining	59
1.2.5	Mold Design	59
1.2.5.1	Types of Molds	60
1.2.5.1.1	Small-Series Mold.....	60
1.2.5.1.2	Test Mold.....	60
1.2.5.1.3	Standard Mold Unit	60
1.2.5.1.4	Conventional Compression Mold	62
1.2.5.2	Structural Mold Designs.....	62
1.2.5.2.1	Positive Mold	62
1.2.5.2.2	Positive Mold with Lands.....	63
1.2.5.2.3	Multi-Cavity Mold with a Common Loading Chamber.....	64
1.2.5.2.4	Multi-Cavity Mold with Individual Loading Chambers.....	64
1.2.5.2.5	Mold with Lateral Core Puller.....	65
1.2.5.2.6	Split Mold	66
1.2.5.2.7	Hinged Split-Cavity Mold	66
1.2.5.2.8	Mold with Inserts.....	67
1.2.5.2.9	Unscrewing Mold	67
1.2.5.3	General Aspects	68
1.2.6	Sheet Molding Compound (SMC)-Molds	69
1.2.6.1	Introduction	69
1.2.6.2	Mold Design.....	70
1.2.6.2.1	Mold Alignment	72
1.2.6.2.2	Ejector Mechanism.....	73
1.2.6.2.3	Undercuts	74
1.2.6.2.4	Heating	75
1.2.7	GMT/LFT Molds	75
1.2.7.1	Introduction	75

1.2.7.2	Process Technology	76
1.2.7.2.1	Pressure Forming	76
1.2.7.2.2	Flow Molding	76
1.2.7.3	Mold Construction	76
1.2.8	Practical Example	77
1.3	Molds for Polyurethane Products	78
	<i>U. Knipp, U. Maier</i>	
1.3.1	Products, Processes, Applications, Shrinkage, and Mold Carriers	79
1.3.1.1	Material Components, Processing, Applications	79
1.3.1.2	Shrinkage	80
1.3.1.3	Mold Carriers	81
1.3.2	Molds for Low-Density PUR Foam	82
1.3.2.1	Processing Parameters	83
1.3.2.1.1	Reaction Temperature	83
1.3.2.1.2	Internal Pressure in Molds	84
1.3.2.2	Filling Technology	85
1.3.2.2.1	Open-Mold Filling Method	85
1.3.2.2.2	Closed-Mold Filling Method	86
1.3.2.3	Venting	87
1.3.2.4	Mold Design	89
1.3.2.4.1	Clamping	91
1.3.2.4.2	Closing and Opening Mechanism, Demolding Aids	92
1.3.2.4.3	Fastening of Inserts	93
1.3.2.5	Molds for Flexible PUR Foams	93
1.3.2.6	Molds for Semirigid Foams	95
1.3.2.7	Molds for Rigid PUR Foams	96
1.3.3	Molds for PUR Integral Skin Foams (Self-Skinning Foams) ..	99
1.3.3.1	Influence of Processing on Mold Design	99
1.3.3.1.1	Temperature control	99
1.3.3.1.2	Sealing at Parting Line, Ejectors, and Side Cores/Sliders ..	100
1.3.3.2	Gating	101
1.3.3.3	Venting	103
1.3.3.4	Molds for Flexible Integral Skin Foams	105
1.3.3.5	Molds for Semirigid Integral Skin Foams	105
1.3.3.6	Molds for Rigid Integral Skin Foams	106
1.3.4	Molds for Microporous PUR Products	107
1.3.4.1	Molds for Flexible, Microporous PUR Products	108
1.3.4.2	Molds for Tough, Rigid, Microporous PUR (RIM) Products ..	108
1.3.4.3	Molds for Rigid, Microporous PUR Products	109
1.3.5	Molds for PUR Casting Systems	110

1.4	Blow Molds	112
	<i>O. Eiselen</i>	
1.4.1	Process Description	112
1.4.1.1	Different Types of Blow Molding Processes	112
1.4.1.2	Extrusion Blow Molding Technology	113
1.4.1.2.1	Continuous Extrusion	113
1.4.1.2.2	Intermittent Parison Generation	114
1.4.1.2.3	Parison Generation	116
1.4.1.2.4	Different Blow Up Methods	117
1.4.1.2.5	Special Procedures	119
1.4.2	Extrusion Blow Molds	120
1.4.2.1	Mold Construction	120
1.4.2.1.1	Prototype Blow Molds Made from Cast Resin	120
1.4.2.1.2	Prototype Blow Molds with Metal-Coated Model and Metal-Filled Cast Resin	120
1.4.2.1.3	Blow Molds Made from Cast Metals	120
1.4.2.1.4	Milled Prototype Molds	121
1.4.2.1.5	Production Blow Molds	121
1.4.2.2	Construction Guidelines	123
1.4.2.2.1	Alignment of Blow Mold	123
1.4.2.2.2	Cutting Edges	124
1.4.2.2.3	Clamp Stops	126
1.4.2.2.4	Venting	126
1.4.2.3	Blow Mold Cooling	126
1.4.2.4	Accessories for Blow Molds	129
1.4.2.5	Integrated Postmolding Processes	130
1.4.2.5.1	Postcooling with a Cooling Fixture	130
1.4.2.5.2	Manufacturing the Finished Product in the Blow Molding Machine	131
1.4.3	Injection Blow Molding and Dip Blow Molding	133
1.4.4	Use of Computers for Blow Molding	135
1.5	Molds for Thermoforming	138
	<i>P. Schwarzmann</i>	
1.5.1	General Information	138
1.5.2	Process in Thermoforming	139
1.5.3	The Mold and the Format Parts	139
1.5.4	Positive or Negative Forming?	141
1.5.5	Design Guidelines for Thermoforming Molds	141
1.5.5.1	Material Choice	141
1.5.5.2	Molding Shrinkage	144
1.5.5.3	Draft Angles	145

1.5.5.4	Radii	145
1.5.5.5	Surface Roughness.....	147
1.5.5.6	Assisting Plug	147
1.5.5.7	Venting Design	150
1.5.5.8	Cavities	152
1.5.5.9	Avoidance of Edge Webbing in Positive Molds.....	152
1.5.5.10	Vacuum Losses when Designing Mold Bottom Wrongly....	153
1.5.5.11	Suggestions for Temperature Control of Hot Forming Molds	154
1.5.6	Substructure of Hot Forming Molds	155
1.5.6.1	Vacuum Forming on a Sheet Processing Machine	155
1.5.6.2	Pressure Air Forming with Forming/Punching Mold with Shear Cutting.....	156
1.5.6.3	Pressure Air Forming with Forming/Punching Mold with Steel Rule Die.....	157
1.6	Rotational and Slush Molds.....	158
	<i>O. Wandres, R. Hentrich</i>	
1.6.1	Process Description	158
1.6.2	Strength of a Rotomolded Part	158
1.6.3	Mold Requirements	159
1.6.4	Nomenclature of Rotational Molds	160
1.6.5	Types of Molds	161
1.6.5.1	Prototype Rotational Molds	161
1.6.5.2	Sheet Steel Rotational Molds.....	162
1.6.5.3	Aluminum Rotational Molds	163
1.6.5.4	Electroplated Molds	165
1.6.6	Mold Construction	168
1.6.6.1	Closing and Clamping of Molds	168
1.6.6.2	Mold Wall Thickness and Centering.....	169
1.6.6.3	Mold Surfaces and Changes	169
1.6.7	Mold Peripheral.....	170
1.6.7.1	Mold Venting	170
1.6.7.2	Non-Permanent Release Agent.....	171
1.6.7.3	Mold Coating (Permanent Release Coatings).....	171
1.6.7.4	Threads	172
1.6.7.5	Other Inserts	172
1.6.8	Post-Processing of Rotomolded Plastic Products	172
1.6.8.1	Openings.....	172
1.6.8.2	Decoration of Rotomolded Plastic Products.....	172
1.6.9	Electroplated Mold for the Slush Molding Process.....	173

1.7	Molds for Thermoplastic Foams	179
	<i>N. Reuber</i>	
1.7.1	Thermoplastic Foams	179
1.7.2	Conventional Molding	182
1.7.2.1	Procedure Description	182
1.7.2.1.1	Filling	183
1.7.2.1.2	Expanding and Fusing	184
1.7.2.1.3	Cooling and Stabilizing	186
1.7.2.1.4	Demolding	187
1.7.2.2	Special Procedure	188
1.7.2.2.1	Process with Non-Perforated Molds	188
1.7.2.2.2	Low Temperature Horizontal (LTH) Process	188
1.7.2.2.3	Transfer Technology	189
1.7.2.2.4	Multiple-Density-Process	189
1.7.3	Mold Construction	190
1.7.3.1	Essential Requirements on the Mold Construction	190
1.7.3.2	Mold Materials	193
1.7.3.3	Mold Equipment	193
1.7.3.4	Special Mold Designs	196
1.7.3.4.1	Mono-Block Molds	196
1.7.3.4.2	Molds with Adjustable Walls (Gradually or Continuously) for Insulation Plates and Small Blocks	196
1.7.3.4.3	Mold for the Thin-Walled Technology	197
1.7.4	Block Molds	197
1.7.4.1	Process Discription	197
1.7.4.2	Constructive Design	199
1.8	Molds for Continuous Fibre Reinforced Polymer Composites	200
	<i>P. Mitschang, R. Schledjewski, A. K. Schlarb</i>	
1.8.1	General Objective	200
1.8.2	Molds for the Vacuum-Autoclave-Technology	201
1.8.2.1	General Objective	201
1.8.2.2	Prepreg-Low Pressure-Autoclave Technology	202
1.8.2.3	Molds for the "Soft Core" Technology	202
1.8.2.3.1	Master Model	202
1.8.2.3.2	Mold Cavity	203
1.8.2.3.3	Product Substitute	204
1.8.2.3.4	Elastic Mat	205
1.8.2.3.5	Manufacturing of Products	205
1.8.2.4	Molds for the Hard-Core Technology	207
1.8.2.4.1	Mold Construction and Materials	207
1.8.2.4.2	Manufacture of Products	207

1.8.2.5	Molds for Automated Tape Laying.....	208
1.8.3	Continuous Fiber-Reinforced Thermoplastics	209
1.8.3.1	General Information and Fundamentals of the Processes ..	209
1.8.3.2	Molds for Semifinished Part Production	209
1.8.3.2.1	General Information and Fundamentals of the Processes ..	209
1.8.3.2.2	Molds for Flat Semifinished Plates	210
1.8.3.2.3	Molds for Profiles	212
1.8.3.3	Molds for Forming Technology (Thermoforming).....	213
1.8.3.3.1	General Information and Fundamentals of the Processes ..	213
1.8.3.3.2	Molds for the Stamp Forming.....	214
1.8.3.3.3	Molds for the Diaphragm Technology.....	217
1.8.3.3.4	Molds for Sandwich Components.....	218
1.8.3.3.5	Molds for the Process Step Integration	219
1.8.3.4	Molds for the Welding Technology	220
1.8.4	Molds for the Resin Injection	221
1.8.4.1	General Information and Fundamentals of the Process	221
1.8.4.2	Molds for the Preform Technology	223
1.8.4.2.1	Binder-Forming Molds	223
1.8.4.2.2	Stitching Technology Molds.....	225
1.8.4.3	Molds for Vacuum Assisted Processes.....	227
1.8.4.3.1	Molds with a Fixed and Flexible Mold Half.....	227
1.8.4.3.2	Molds with Two Fixed Mold Halves	230
1.8.4.4	Molds for Pressure-Assisted Processes	232
1.8.4.5	Molds for Hollow Components	235
1.8.5	Molds for the Winding Technology	238
1.8.5.1	General Information and Fundamentals of the Process	238
1.8.5.2	Molds for Rotationally Symmetrical Components.....	238
1.9	Molds for Elastomer Processing.....	241
	<i>Th. Bauernhansl, K. Zoller</i>	
1.9.1	Compression Molding (CM).....	242
1.9.2	Transfer Molding (TM)	244
1.9.3	Injection Molding (IM)	246
1.9.4	Additional Processes	250
1.9.4.1	Process Combinations.....	250
1.9.4.2	Gate Systems	251
1.9.5	Mold Making	254
1.9.5.1	Types of Molds	255
1.9.5.2	Mold Development	255

1.10	Micro Injection Molds	258
	<i>G. Konzilia</i>	
1.10.1	General Information.....	258
1.10.1.1	Injection Molding Process	258
1.10.1.2	Molded Part Design	258
1.10.1.2.1	Cooperation with Customers.....	259
1.10.1.3	Materials for Injection Molded Parts	260
1.10.2	Design	261
1.10.2.1	The Micro-injection Mold.....	261
1.10.2.1.1	Gate.....	261
1.10.2.1.2	Demolding and Ejection	262
1.10.2.1.3	Venting.....	263
1.10.2.1.4	Mold Guiding and Centering.....	264
1.10.2.1.5	Temperature Control and Cooling	265
1.10.2.2	Special Procedures and Alternative Processes	265
1.10.2.2.1	Variotherm	265
1.10.2.2.2	Insertion Technology.....	266
1.10.2.2.3	Multi-Component and Assembly Injection Molding.....	266
1.10.2.2.4	Compression Injection Molding	267
1.10.2.2.5	Hot Embossing.....	267
1.10.2.3	Environment and Continuing Processes	268
1.10.3	Manufacture.....	269
1.10.3.1	Construction.....	269
1.10.3.1.1	Materials for Constructional Parts	269
1.10.3.1.2	Standard Parts.....	269
1.10.3.2	Cavity Stacks	269
1.10.3.2.1	Material for Cavity Stacks	270
1.10.4	Manufacturing Technologies.....	270
1.10.4.1	In General.....	270
1.10.4.1.1	Mechanical Manufacturing Technologies	270
1.10.4.1.2	Alternative Manufacturing Processes	274
1.10.4.1.3	Surface Treatment and Refining	276
1.10.4.1.4	Quality Assurance	277
1.10.5	Injection Molding Machine	277
1.10.6	Mold Maintenance	278
1.10.7	Outlook	279
1.11	Prototype, Small and Pre-Series Molds.....	280
	<i>R. Hofmann</i>	
1.11.1	Introduction	280
1.11.2	Indirect Prototype Molding	280
1.11.2.1	Vacuum Casting Polyurethane (PU) on silicone molds	280

1.11.2.1.1	Vacuum Casting PU Process	280
1.11.2.1.2	Manufacture of Silicone Molds PU	283
1.11.2.2	Vacuum Casting Polyamide (PA) through silicone molds...	284
1.11.2.3	Synthetic Resin Molds	287
1.11.2.3.1	Polyurethane Casting with Synthetic Resin Molds	287
1.11.2.3.2	Manufacture of Synthetic Resin Molds	287
1.11.2.4	Manufacture of Synthetic Resin Molds for Injection Molding	290
1.11.2.5	Molds Manufactured through Generative Manufacturing Procedures on the Example of LaserCUSING®-Technology .	292
1.11.2.6	Aluminum Molds	294
1.11.2.6.1	Manufacture of Aluminum Molds	294
1.11.2.6.2	Aluminum Molds with LaserCUSING® Loose Parts	295
1.11.2.6.3	Aluminum Materials	295
2	Mold Design	301
2.1	Design Process	301
	<i>P. Karlinger, F. Hinken</i>	
2.1.1	Introduction	301
2.1.1.1	Injection Molds	303
2.1.1.2	Phases of the Mold Design	303
2.1.1.3	From the Offer to the Design	307
2.1.1.4	The Design Process in Injection Molds	318
2.1.2	Simulation for Injection Mold Making	323
2.1.2.1	General Information	323
2.1.2.2	The Types of Models	325
2.1.2.3	The Flow Pattern	326
2.1.2.4	Shrinkage and Warpage	328
2.1.2.5	Thermal Design	329
2.1.2.6	Summary	331
2.2	Standardization and Standards	332
	<i>J. Gockel, A. Brandt</i>	
2.2.1	Standardization for Injection Molding and Hot Runner Molds	332
2.2.2	Standards in Mold Making	335
2.2.2.1	Molds	336
2.2.2.2	Standardized Guide Element in Mold Making	341
2.2.2.3	Standards for Demolding	343
2.2.2.4	Temperature Control	345

2.3	Hot and Cold Runner Technology.....	349
	<i>D. Paulmann, M. Sander</i>	
2.3.1	Advantages of Using the Hot Runner Technology.....	349
2.3.2	Design of Hot Runner Systems and Hot Halves.....	351
2.3.3	Application Areas and Examples.....	352
2.3.3.1	Hot Runner Solutions for Packaging Parts, Closures, and Miscellaneous Polyolefin Applications.....	353
2.3.3.2	Hot Runner Solutions for Technical Components.....	356
2.3.3.3	Hot Runner Solution for Small and Micro Injection Molded Parts.....	358
2.3.3.4	Hot Runner Solutions for Multi-Point Gating through Nozzles and Multi-Nozzles.....	360
2.3.3.5	Hot Runner Solutions with Needle Valve.....	361
2.3.4	Hot Runner Manifold Systems, Wired Systems, and Hot Halves.....	367
2.3.5	Hot Runner Control Technology.....	370
2.3.6	Cold Runner Systems.....	372
2.3.6.1	Function and Advantages.....	372
2.3.6.2	Processable Materials.....	373
2.3.6.3	Mold Technology.....	375
2.3.6.4	Demolding.....	375
2.3.6.5	Mold Temperature Control.....	376
2.4	Temperature Control of Injection Molds.....	377
	<i>P. Thienel</i>	
2.4.1	Tasks and Goals of the Mold Temperature Control.....	377
2.4.2	Influence of Processing Temperatures on the Cooling and Cycle Time.....	379
2.4.3	Cavity Temperature.....	379
2.4.4	Influence of Temperature Control on the Molded Part Properties.....	381
2.4.5	Requirements for the Temperature Control System.....	383
2.4.6	Temperature Control Channels.....	383
2.4.7	Flow Principle.....	385
2.4.7.1	Series Temperature Control.....	385
2.4.7.2	Parallel Temperature Control.....	386
2.4.8	Practical Designs of Conventional Temperature Control Options.....	387
2.4.8.1	Flat Temperature Control.....	387
2.4.8.2	Temperature Control of Molded Part Corners.....	388
2.4.8.3	Temperature Control of the Core.....	389
2.4.8.3.1	Temperature Control Tubes.....	389

2.4.8.3.2	Separating Plate (Deflection Bar).....	389
2.4.8.3.3	Spiral Cores	390
2.4.8.3.4	Heat Pipe.....	390
2.4.8.4	More Conventional Temperature Control Options	392
2.4.8.4.1	Circumferential Application Temperature Control.....	392
2.4.8.4.2	Inserts Made from Different Materials.....	392
2.4.9	New Temperature Control Technologies	393
2.4.9.1	Contour-Depending Temperature Control.....	393
2.4.9.1.1	Vacuum Brazing Technology.....	394
2.4.9.1.2	Selective Laser Sintering (SLS).....	395
2.4.9.2	CO ₂ Temperature Control.....	395
2.4.9.2.1	CO ₂ Temperature Control with Sintered Material.....	396
2.4.9.2.2	CO ₂ Temperature Control with Conventional Steel.....	397
2.4.9.3	Dynamic Temperature Control	397
2.4.10	Thermal Mold Design	400
2.4.11	Position of the Temperature Sensor for External Temperature Control	402
2.5	Innovative Mold Technologies.....	405
	<i>T. Eulenstein</i>	
2.5.1	Coating Technology - Design Surfaces through Combined Surface and Coating Technologies.....	405
2.5.2	Temperature Control Technology - Inductive Heating of Injection Molds	410
2.5.3	Vacuum Technology - Alternative Possibilities, Optimization of Surfaces.....	415
2.5.4	Mold Technology - Flexible Sealing Elements for the Flash- and Damage-Free Encapsulation of Inserts.....	417
3	Materials for Mold Making	421
3.1	Plastic Mold Steels	421
	<i>F. Hippenstiel</i>	
3.1.1	Introduction	421
3.1.2	Steel making and processing	423
3.1.2.1	Steelmaking.....	423
3.1.2.2	Heat treatment.....	425
3.1.2.3	Machining.....	427
3.1.2.4	Surface machining.....	427
3.1.2.5	Quality assurance.....	428
3.1.3	Overview of plastic mold steels	428
3.1.3.1	Pre-hardened plastic mold steels.....	434
3.1.3.2	Through-hardening plastic mold steels	436

3.1.3.3	Corrosion-resistant plastic mold steels	437
3.1.3.4	Plastic mold steels for case hardening	439
