Compression Molding

3-446-22166-2

www.hanser.de

Table of Contents

1 Introduction 1

1.1 Historical Background..... 1
1.2 The Compression Molding Process..... 6
1.3 Compression Molding of SMC and BMC.....10
1.4 Compression Molding of GMT and LFT.....13
1.5 Outlook 16
References 18

2. Compression Molding Materials.....19

2.1 Introduction to Polymers.....19
2.1.2 Thermoplastic Polymers.....21
2.1.3 Amorphous Thermoplastics.....21
2.1.4 Semi-Crystalline Thermoplastics.....23
2.1.5 Thermosets and Cross-Linked Elastomers.....25
2.2 Compression Molding Material Preparation..... 27
2.2.1 Thermosetting Resins.....27
2.2.2 Thermoplastic Resins..... 28
2.2.3 Funtional Additives.....29
2.2.3.1 Initiators..... 29
2.2.3.2 Inhibitors.....30
2.2.3.3 Low Profile Additives (LPA).....30
2.2.4 Fillers and Reinforcements..... 30
2.2.4.1 Glass Fibers.....31
2.2.4.2 Carbon Fibers.....31
2.2.4.3 Aramid Fibers.....32
2.2.5 Comounded Materials..... 32
2.2.5.1 Sheet Molding Compound (SMC).....32
2.2.5.2 Bulk Molding Compound (BMC).....34
2.2.5.3 Glass-mat Thermoplastic (GMT)..... 35
2.2.5.4 Long Fiber Thermoplastic (LFT)..... 36
2.3 Mechanical Behavior of Filled and Reinforced Polymers..... 38
2.3.1 Anisotropic Strain-Stress Relation.....40
2.3.2 Aligned Fiber Reinforced Composite Laminates..... 41
2.3.3 Transformation of Fiber Reinforced Composite ..... Laminate Properties..... 44
2.3.4 Properties of Compression Molded Plate with a Fiber Orientation Distribution Function.....46
References 47

3 Processing Fundamentals 49

3.1 Mold Filling 49
3.1.1 Material Preparation 49
3.1.2 Compression Molding of Thermoplastics 50
3.1.3 Compression Molding of Thermosets 55
3.1.4 Anomalies During Mold Filling 60
3.1.4.1 Fiber-Matrix Separation 60
3.1.4.2 Preferential Flow 65
3.1.4.3 Knitline Formation 67
3.1.4.4 Race Tracking/Flow Hesitation 71
3.2 Anisotropy Development During Processing 71
3.2.1 Anisotropy Development in Thermoplastic Parts 72
3.2.2 Anisotropy Development in Thermoset Parts 76
3.2.3 Quantifying Anisotropy in the Final Part 80
3.2.4 Fiber Damage 84
3.3 Solidification Process 87
3.3.1 Solidification of Thermoplastics 88
3.3.2 Solidification of Thermosets 94
3.3.3 Residual Stresses and Warpage of Polymeric Parts 103
References 109

4 Part Design 111

4.1 Geometric Considerations 111
4.1.1 Design Objectives 112
4.1.2 Part Design Guidelines for Compression Molded Plastic Parts 113
4.1.2.1 Constant Wall Thickness 113
4.1.2.2 Minimize Wall Thickness 115
4.1.2.3 Ribs and Bosses 118
4.1.2.4 Molded-in Openings 122
4.1.3 Mold Objectives 126
4.1.3.1 Structural Integrity 126
4.1.3.2 Part Ejection 127
4.1.3.3 Shear Edge 128
4.2 Simulation 129
4.2.1 History 131
4.2.2 Governing Behavior 131
4.2.2.1 Flow Models 132
4.2.2.2 Orientation Models 135
4.2.2.3 Heat Transfer Models 136
4.2.2.4 Shrinkage and Warpage Models 137
4.2.3 Finite Element/Control Volume Approach 138

4.2.4 Mold Filling Simulations 140
4.2.5 Fiber Orientation Simulation 147
4.2.6 Shrinkage and Warpage Simulations 150
4.2.7 Structural Behavior Simulations 150
4.2.8 Integrated Design Process Summary 153
4.2.9 Conclusions 157
References 158

5 Troubleshooting the Compression Molding 159

5.1 Introduction 159
5.1.1 Corrective and Preventive Actions 160
5.2 Troubleshooting Guide 161

Appendix 189
