List of Contributors	V
Dedication	IX
Preface	XI
1 Introduction	1
<i>James W. Summers</i>	
1.1 Chemistry and Physical Structure	1
1.1.1 Raw Materials	1
1.1.2 Chlorine Content and Combustion Resistance	2
1.1.3 Polymerization Morphology	3
1.1.4 Vinyl's Unique Melt Processing	3
1.1.5 Properties Depend on Formulation and Processing History	3
1.1.6 Vinyl as a Thermoplastic Elastomer (TPE)	4
1.1.7 PVC's Solubility Parameter and Ease of Compounding	6
1.2 Vinyl's Proud History	6
1.2.1 PVC Meeting Society's Needs	6
1.2.2 The PVC Industry as a Responsible Citizen	7
1.2.3 Historic Events	7
1.2.3.1 Chlorine	7
1.2.3.2 Vinyl Chloride	7
1.2.3.3 Polymerization	7
1.2.3.4 Early Processing	8
1.2.3.5 Plasticized PVC as a TPE	8
1.2.3.6 Wire and Cable	8
1.2.3.7 Pipe and Fittings	9
1.2.3.8 Siding, Windows, and Packaging	10
1.2.3.9 Society of Plastics Engineers, Vinyl Division	10
1.2.3.10 Weatherability	10
1.2.3.11 Vinyl Chloride Exposure and Responsible Care	10
1.2.3.12 Recycling	11
1.3 Commercial Significance	11
1.3.1 Growth of the Vinyl Industry	11
1.3.2 PVC as a Major Thermoplastic	13
1.3.3 PVC as a Thermoplastic Elastomer (TPE)	14
1.3.4 PVC as an Engineering Thermoplastic	15

2 Vinyl Chloride Monomer 19*Joseph A. Cowfer*

2.1	Overview	19
2.2	Introduction	19
2.3	Physical Properties	21
2.4	Reactions	21
2.4.1	Polymerization	21
2.4.2	Substitution at the Carbon-Chlorine Bond	22
2.4.3	Oxidation	23
2.4.4	Addition	24
2.4.5	Photochemistry	25
2.4.6	Pyrolysis	25
2.5	Manufacture	26
2.5.1	Direct Chlorination of Ethylene	29
2.5.2	Oxychlorination of Ethylene	30
2.6	Purification of Ethylene Dichloride for Pyrolysis	33
2.7	Ethylene Dichloride Pyrolysis to Vinyl Chloride	34
2.8	By-Product Disposal	35
2.9	Economic Aspects	36
2.10	Environmental Considerations	41
2.11	Technology Trends	42
2.12	Specifications	45
2.13	Health and Safety Factors	46
2.14	Uses	47

3 Polymerization 57*Donald E. Witenhafer, David J. Poledna*

3.1	Basic Considerations	57
3.2	Suspension Process Overview	60
3.2.1	Polymerization	60
3.2.2	Stripping	64
3.2.3	Centrifugation	65
3.2.4	Drying and Screening	66
3.3	Mass Process Overview	66
3.4	Special Considerations	69
3.4.1	Polymerization Kinetics	69
3.4.2	Resin Particle Structure and Formation	70
3.4.3	Agitation and Dispersants	72
3.4.4	Vinyl Chloride Recovery	74
3.4.5	Increasing Reactor Productivity	74
3.4.6	Chain Defects and Heat Stability	77
3.4.7	Molecular Weight Extension	78
3.4.8	Co-Polymerization	79
3.5	Summary	79

3.6	Microsuspension and Emulsion Polymerization	80
3.6.1	Microsuspension Polymerization of Vinyl Chloride Compared to Emulsion and Suspension Polymerization	81
3.6.2	Procedure and Variations	81
3.6.3	Emulsion Polymerization of Vinyl Chloride Compared to Microsuspension and Suspension PVC Polymerization	82
3.7	Procedure for Batch Polymerization	83
3.8	Other Considerations for Microsuspension and Emulsion Polymerization of PVC	83
3.8.1	Surfactant System	83
3.8.2	Initiators	84
3.8.3	Water	84
3.8.4	Copolymers	84
3.9	Primary Particle Size Microsuspension	85
3.9.1	Primary Particle Size Emulsion	85
3.10	Molecular Weight	87
3.11	Polymerization Equipment Operation	87
3.11.1	Homogenizers	87
3.11.2	Reaction Vessels	87
3.11.3	Agitation	88
3.11.4	Heat Removal	89
3.12	Downstream Equipment	90
3.12.1	Residual Vinyl Chloride Removal (Stripping)	90
3.12.2	Drying	91
3.12.3	Grinding	92
3.12.4	Packaging	92
3.13	Product Quality	92
3.14	Safety and Environment	93
4	PVC Stabilizers and Lubricants	95
	<i>Thomas C. Jennings, William H. Starnes, Jr.</i>	
4.1	Introduction	95
4.2	World PVC Stabilizer and Lubricant Markets	96
4.3	Structure and Degradation of PVC	97
4.4	The General Stabilization of PVC	101
4.5	The General Lubrication of PVC	101
4.6	Lead Stabilizers	102
4.6.1	Lead Stabilizer Chronology	103
4.6.2	Lead Stabilizer Manufacturing	104
4.6.3	Lead Stabilization Mechanisms	105
4.6.4	Lead Stabilizers of Commercial Importance	105
4.6.5	Lead Stabilizer Strengths and Weaknesses	106
4.6.6	Lead Stabilizer/Lubricant Use Levels	107
4.7	Organotin Stabilizers	108
4.7.1	Organotin Stabilizer Chronology	108

4.7.2	Organotin Stabilizer Manufacturing	110
4.7.3	Organotin Stabilizer Mechanism	112
4.7.4	Organotin Stabilizers of Commercial Importance	112
4.7.5	Organotin Stabilizer Synergists	113
4.7.6	Lubrication of Organotin Stabilizers	115
4.7.7	Organotin Stabilizer Strengths and Weaknesses	115
4.7.8	Organotin Stabilizer/Lubricant Use Levels	115
4.8	Mixed Metal Stabilizers	116
4.8.1	Mixed Metal Chronology	116
4.8.2	Mixed Metal Manufacturing	118
4.8.3	Mixed Metal Stabilizer Mechanisms	120
4.8.4	Mixed Metal Stabilizer Synergists	120
4.8.4.1	Epoxy Esters	123
4.8.4.2	Phosphite Esters	124
4.8.4.3	Minor Organic Synergists	126
4.8.4.4	Inorganic Acid Scavengers	126
4.8.5	Mixed Metal Strengths and Weaknesses	126
4.8.6	Mixed Metal Stabilizer/Lubricant Use Levels	127
4.9	PVC Lubricants	129
4.9.1	Internal and External Lubricants	129
4.9.2	Three Category Lubricant Classification	130
4.9.3	Lubricant-Lubricant Interactions	132
4.9.4	Stabilizer Lubricant Interactions	134
4.9.5	Lubricating Stabilizers	135
4.9.7	Stabilizer Lubricant One-Packs	135
4.9.8	Lubricant Sources	137
4.9.8.1	Petroleum Waxes	137
4.9.8.2	Synthetic Hydrocarbon Waxes	137
4.9.8.3	Mineral Waxes	138
4.9.8.4	Natural Triglycerides	139
4.10	Testing of Stabilizers and Lubricants	140
4.10.1	Oven Stability Tests	141
4.10.2	Press Clarity and Color	142
4.10.3	Dynamic Milling	142
4.10.4	Torque Rheometer Testing	142
4.10.5	Plate-Out Test	143
4.10.6	Volatility Tests	144
4.10.7	Compatibility Tests	145
4.10.8	Stabilizer-Stabilizer-Incompatibilities	145
4.11	Suppliers of PVC Stabilizers and Lubricants	145
4.12	PVC Stabilizer Environmental Concerns	146
4.12.1	General Environmental Concerns	147
4.12.2	Lead Environmental Concerns	148
4.12.3	Cadmium Environmental Concerns	149
4.12.4	Barium Environmental Concerns	149
4.12.5	Organotin Environmental Concerns	150

4.12.6	Stabilizers Based Upon Food Additives	151
4.13	Chemistry of Degradation and Stabilization	155
4.14	Mechanism of Thermal Dehydrochlorination	156
4.14.1	Thermally Labile Structural Defects	156
4.14.2	Hypothetical Labile Structures	157
4.14.3	Polyene Elongation	158
4.14.3.1	Ion-Pair/Quasiionic Mechanism	158
4.14.3.2	Other Proposed Mechanisms	159
4.14.3.3	Autocatalysis	160
4.15	Thermal Stabilization	161
4.15.1	General Mechanisms	161
4.15.2	Stabilizers Containing Metals	162
4.15.3	Organic Stabilizers	163
4.15.3.1	Costabilizers	163
4.15.3.2	Principal Stabilizers (Ester Thiols)	164
4.16	Acknowledgments	166
5	Plasticizers	173
	<i>Leonard G. Krauskopf, Allen Godwin</i>	
5.1	Introduction	173
5.2	Historical Developments	173
5.3	Mechanisms of Plasticization	174
5.4	Types of Plasticizers	176
5.5	Plasticizer Performance	182
5.6	Plasticizer Efficiency	186
5.7	Low Temperature	187
5.8	Permanence (Transience) of Plasticizers	190
5.9	Solvency, Miscibility, or Compatibility	191
5.10	Processability	192
5.11	Plasticizer Markets	193
5.12	Health Aspects of Plasticizers	195
5.13	Future of Plasticizers	197
6	Processing Aids and Impact Modifiers	201
	<i>Carlos A. Cruz-Ramos and John R. Patterson</i>	
6.1	Processing Aids	201
6.1.1	Introduction	201
6.1.2	Development	201
6.1.3	Role of Processing Aids in PVC	203
6.1.3.1	Promotion of Homogeneous Melt	203
6.1.3.2	Melt Homogeneity	205
6.1.3.3	Melt Strength, Extensibility, and Elasticity	207
6.1.4	Benefits of Processing Aids in PVC	207
6.1.4.1	Extrusion	207

6.1.4.2	Foam Extrusion	208
6.1.4.3	Calendering/Thermoforming	209
6.1.4.4	Injection Molding	209
6.1.4.5	Blow Molding	211
6.1.5	Commercial Sources of Processing Aids	212
6.2	Impact Modifiers	212
6.2.1	Introduction	212
6.2.2	Development	213
6.2.3	Impact and Toughness Testing	214
6.2.3.1	Methodology	214
6.2.3.2	Role of Fusion (Gelation)	218
6.2.4	Impact Modification Theory	220
6.2.5	Impact Modifiers – Function, Features, and Types	224
6.2.5.1	Predefined Particle Size Modifiers	226
6.2.5.2	Intermediate Modifiers	227
6.2.5.3	Modifiers with Non-Predefined Particle Size	228
6.2.5.4	Other Types of Modification	229
6.2.6	Impact Modifier Selection	229
6.2.7	Commercial Sources	231
7	Fillers and Reinforcing Agents	235
	<i>Joel M. Zazyczny, Laurent M. Matuana</i>	
7.1	Mineral Fillers in PVC Matrix	235
7.1.1	Introduction	235
7.1.2	Mineral Properties	235
7.1.3	Particle Properties	236
7.1.3.1	Particle Size Distribution	236
7.1.3.2	Surface Area	237
7.1.3.3	Optical Characteristics	238
7.1.3.4	Color	238
7.1.3.5	Aspect Ratio	238
7.1.3.6	Specific Gravity/Density	239
7.1.3.7	Mohs Hardness	239
7.1.3.8	Particle Packing Fraction	240
7.1.4	Commercial Mineral Fillers and Reinforcing Agents	240
7.1.4.1	Calcium Carbonate (CaCO_3)	240
7.1.4.2	Kaolin ($\text{Al}_2\text{O}_3 \cdot 2\text{SiO}_2 \cdot 2\text{H}_2\text{O}$)	241
7.1.4.3	Talc ($\text{Mg}_3\text{Si}_4\text{O}_{10}(\text{OH})_2$)	241
7.1.4.4	Mica ($\text{K}_2\text{M}(\text{Al}_2\text{Si}_6\text{O}_{20})(\text{OH})_4$)	242
7.1.4.5	Barite (BaSO_4)	242
7.1.4.6	Wollastonite (CaSiO_3)	243
7.1.4.7	Calcium Sulfate ($\text{CaSO}_4 \cdot 2\text{H}_2\text{O}$)	243
7.1.4.8	Nepheline Syenite/Feldspar	244
7.1.4.9	Glass Microspheres	244
7.1.5	Applications and Development in PVC Compounds	244

7.1.6	Surface Treatment and Coupling Agent Technology	246
7.1.6.1	Stearates	247
7.1.6.2	Zirconates, Titanates, and Zirco-Aluminates	247
7.1.6.3	Silanes	247
7.2	Natural Fillers in PVC Matrix	248
7.2.1	Introduction	248
7.2.2	Characteristics of Natural Fibers	250
7.2.2.1	Wood Structure	250
7.2.2.2	Chemical Composition of Wood	251
7.2.3	PVC/Natural-Fiber Composites	253
7.2.3.1	Influence of Processing Conditions	253
7.2.3.2	Effects of Additives Used in the Formulations	254
7.2.3.3	Foaming of PVC/Natural-Fiber Composites	264
7.2.3.4	Durability of PVC/Natural-Fiber Composites	269
8	PVC Blends and Alloys	277
	<i>Donald E. Witenhafer</i>	
8.1	Introduction	277
8.2	High Heat Distortion Temperature PVC Blends	279
8.2.1	Glutarimide Copolymers	279
8.2.2	ABS Blends	279
8.2.3	Suprel	280
8.2.4	Styrene/Maleic Anhydride (SMA) Copolymer Blends	281
8.3	Flexible PVC Blends	281
8.3.1	Butadiene Acrylonitrile Copolymer Blends	281
8.3.2	Polyketone Blends	285
8.4	Compatibilizers	285
8.5	Summary	286
9	Compounding Processes	289
	<i>Rabeh Elleithy, James W. Summers</i>	
9.1	Introduction	289
9.2	Connection Between Polymerization and Compounding	289
9.3	Powder Mixing of PVC	293
9.3.1	Role of High Speed Mixing	293
9.3.2	Agglomeration Problems with High Speed Mixing	293
9.3.3	Solutions to the Agglomeration Problems in High Speed Mixing	295
9.3.4	Powder Flow and Packing	295
9.3.5	Vinyl Chloride Monomer Removal	296
9.3.6	Plasticizer Addition	296
9.4	Distribution and Dispersion of Ingredients	298
9.4.1	Effective Dispersion	298
9.4.1.1	Interfacial Tension on Dispersion	298
9.4.1.2	Compatibility of Materials for Dispersion	298

9.4.1.3	Elongational Work for Dispersion	300
9.4.2	Temperature Requirements	302
9.4.3	Avoiding Shear Heating	305
9.5	Powder to Product by Twin Screw Extrusion	306
9.6	Powder to Compound with an Internal Batch Mixer (Banbury) and Mill	307
9.7	Powder to Compound in an Internal Continuous Mixer and Mill	309
9.8	Powder to Compound by Single Screw Compounding	310
9.9	Powder to Compound by Reciprocating Single Screw Compounding	311
9.10	Powder to Compound by Twin Screw Compounding	312
9.11	Summary	314
10	Flexible PVC	315
	<i>William Coaker</i>	
10.1	Origins	315
10.2	Types of PVC Resins Used in Flexible Applications	316
10.3	Particulate Architecture of PVC Resins Used in Flexible Products	318
10.4	Favored Processing Methods for Flexible PVC	321
10.5	Designing Flexible PVC Compounds	323
10.5.1	Formulation Development	323
10.5.2	General Problems in Formulation Development	324
10.5.3	Properties Often Specified for Semi-Rigid and Flexible PVC Products	327
10.6	Additives Used in Flexible PVC Compounds	329
10.6.1	Liquid Plasticizers and Solid Flexibilizers	329
10.6.2	Lead-Based Stabilizers	331
10.6.3	Mixed Metal Stabilizers	333
10.6.4	Fillers	334
10.6.5	Lubricants	337
10.6.6	Light Stabilizers	337
10.6.7	Flame Retardants and Smoke Suppressants	339
10.6.8	Other Additives	341
10.7	Markets for Flexible and Semi-Rigid PVC	341
10.8	Specifications for and Quality Control Testing on Flexible PVC Products	356
10.8.1	Tensile Properties after Oven Aging	356
10.8.2	Thermal Stability by Torque Rheometer	357
10.8.3	Melt Viscosity	358
10.8.4	Hardness	358
10.8.5	Low Temperature Brittleness	358
10.8.6	Plasticizer Compatibility	359
10.8.7	Moisture	359
10.8.8	Poor Dispersion, Contamination, and Resin Gels	360
10.8.9	Small-Scale Defects and Surface Phenomena	360
10.9	Regulatory Issues	360
10.10	Future Projections	360

11 Specialty Grade PVC Resins 365

Ashok Shah, David Poledna, Andy Olah

11.1 Dispersion and Blending Resins 365

11.2 Powder Process Resins 372

 11.2.1 PVC for Powder Coating and Powder Molding Systems 372

11.3 Specialty Suspension PVC Resins 373

 11.3.1 Ultra High Molecular Weight Resins 374

 11.3.2 Ultra High Absorptive Resin 375

 11.3.3 Deglossing or Dulling Resins 377

 11.3.4 Specialty Grade Emulsion Resins 378

11.4 Copolymer Resins 379

 11.4.1 Conventional VCl/VAc Copolymers 380

 11.4.2 Solution Polymers 380

 11.4.3 Elastomeric Resins 381

11.5 Overview of Chlorinated Polyvinyl Chloride Materials, Products, and Applications 382

 11.5.1 Introduction 382

 11.5.2 The Chlorination Process 383

 11.5.3 Chlorinated Polyvinyl Chloride Compounds 386

 11.5.4 End Use Applications for Chlorinated Polyvinyl Chloride Compounds 386

 11.5.4.1 Potable Water Distribution at Elevated Temperatures 386

 11.5.4.2 Industrial Handling of Corrosive Fluids at Elevated Temperatures 390

 11.5.4.3 CPVC-Based Fire Sprinkler Systems 391

 11.5.4.4 CPVC Based Non-Pipe Products that Offer Alternatives to Other High Temperature Thermoplastics 393

 11.5.5 Summary 393

12 Physical Properties and Characterization of PVC 395

Charles A. Daniels

12.1 Introduction 395

12.2 Characterization at the Molecular Level 395

12.3 Characterization at the Particulate Level 400

12.4 Characterization of Vinyl Compounds 403

12.5 Typical Characterization Requirements in the Laboratory 413

12.6 Miscellaneous Properties 415

12.7 Summary 415

13 Flammability and Fire Performance 419

Marcelo M. Hirschler

13.1 Introduction 419

13.2 Thermal Degradation and Thermal Decomposition 419

13.3 Thermal Decomposition and Fire Properties 423

13.4	Fire Performance: General	424
13.5	Individual Fire Properties and Associated Test Methods	425
13.5.1	Ignitability	425
13.5.1	Ease of Extinction	439
13.5.2	Flammability	441
13.5.3	Flame Spread	443
13.5.4	Heat Release	449
13.5.5	Smoke Obscuration	458
13.6	Fire Retardance and Smoke Suppression	465
13.6.1	Smoke Toxicity	468
13.6.2	Fire Modeling and Fire Hazard Assessment	470
	Appendix 1 – Fire Safety Definitions	477
	Appendix 2 – Meaning of Major Cone Calorimeter Fire Properties	481
14	Weathering of PVC Compounds	483
	<i>Elvira Rabinovitch</i>	
14.1	Introduction	483
14.2	Weathering Mechanism	483
14.3	Weatherability Comparison Between PVC and Other Polymers	487
14.4	Weathering Testing Methods	489
14.4.1	Outdoor Exposure	489
14.4.2	Accelerated Laboratory Exposure	489
14.4.3	Outdoor Exposure Standards	490
14.5	Factors Affecting Outdoor Performance of PVC	491
14.5.1	Color Stability	491
14.5.1.1	Stabilizers	491
14.5.1.2	Pigments	493
14.5.1.3	Effect of Calcium Carbonate on PVC Weatherability	495
14.5.1.4	Effect of Process Conditions on Color Weatherability	496
14.5.2	Impact Retention	497
14.5.2.1	PVC Resin	497
14.5.2.2	Impact Modifier	498
14.5.2.3	Stabilizer	499
14.5.2.4	Filler	499
14.5.2.5	Compound Processing Conditions	500
14.5.3	Dimensional Stability	501
14.5.3.1	Material Properties	501
14.5.3.2	Product Design Considerations	504
14.5.3.3	Internal Stresses in the Profile	505
14.6	Industry Trends and Recommendations	505
14.7	US Industry Standards	506
14.8	Conclusions	508

15 Fabrication Processes 511

James L. Throne

15.1	Introduction	511
15.2	Rigid PVC Processes	513
15.2.1	Extrusion	513
15.2.1.1	Single-Screw Extruder	513
15.2.1.2	Twin-Screw Extruder	517
15.2.1.3	Cylindrical versus Conical Twin-Screw Extruders	519
15.2.1.4	Melt Flow Path to the Die	520
15.2.1.5	Gear Pump	521
15.2.1.6	General Die Design	522
15.2.1.7	Foam Extrusion	528
15.2.1.8	Downstream Calibration and Take-Off	530
15.2.2	Calendering	531
15.2.3	Injection Molding	534
15.2.3.1	Screw Injection Molding Machine	535
15.2.3.2	Injection Mold Design	539
15.2.4	Blow Molding	543
15.2.4.1	Extrusion Blow Molding	543
15.2.4.2	Injection Blow Molding	549
15.2.5	Thermoforming	550
15.2.5.1	Thin-Gauge Thermoforming	551
15.2.5.2	Heavy-Gauge Thermoforming	560
15.2.5.3	Other Heavy-Gauge PVC-Type Sheet Forming	565
15.2.6	Compression Molding with Radio-Frequency Heating	566
15.3	Composite Processing	568
15.3.1	Fillers	568
15.3.3	Foams	571
15.3.4	Effect of Fillers and Reinforcements on Viscosity	575
15.3.5	Effect of Dissolved Gases on Viscosity	577
15.3.6	Filled and Reinforced Foams – A Comment	577
15.3.7	The Role of Additives	578
15.4	Processing PVC-Containing Polymers	579
15.4.1	Processing Chlorinated PVC	579
15.4.2	PVC-ABS	580
15.4.3	PVC-PMMA	580
15.5	Plasticized PVC Processes	581
15.5.1	Liquid Processing	582
15.5.1.1	Coating	582
15.5.1.2	Slush Molding	583
15.5.1.3	Rotational Molding	583
15.5.2	Soft Processing	587
15.5.2.1	Flow Molding	587
15.5.2.2	Drysol Rotational Molding	588
15.5.3	Lower-Durometer or Semi-Rigid Processing	589

15.5.3.1	Extrusion	589
15.5.3.2	Blow Molding	590
15.5.3.3	Injection Molding	590
15.5.3.4	Blown Film	591
15.6	Joining and Assembly	593
