# Contents

	Introduction . . . . .	1
Lesson 1	Plastics Fundamentals . . . . .	5
	1.1 What are Plastics? . . . . .	6
	1.2 What are Plastics Made Of? . . . . .	6
	1.3 How are Plastics Classified? . . . . .	7
	1.4 How are Plastics Identified? . . . . .	8
	1.5 What are the Physical Properties of Plastics? . . . . .	8
	Review Questions . . . . .	12
Lesson 2	Raw Materials and Polymer Synthesis . . . . .	13
	2.1 Raw Materials for Plastics . . . . .	14
	2.2 Monomers and Polymers . . . . .	15
	2.3 Polyethylene Synthesis . . . . .	16
	Review Questions . . . . .	18
Lesson 3	Methods of Polymer Synthesis . . . . .	19
	3.1 Addition of Polymerization . . . . .	20
	3.2 Polycondensation . . . . .	22
	3.3 Polyaddition (step addition) . . . . .	24
	Review Questions . . . . .	26
Lesson 4	Bonding Forces in Polymers . . . . .	27
	4.1 Bonding Forces Within Molecules . . . . .	28
	4.2 Intermolecular Forces . . . . .	28
	4.3 Effects of Temperature . . . . .	29
	Review Questions . . . . .	30
Lesson 5	Classification of Plastics . . . . .	31
	5.1 Identification of Plastics Categories . . . . .	32
	5.2 Thermoplastics . . . . .	32
	5.3 Cross-linked Plastics (Elastomers, Thermosets) . . . . .	34
	Review Questions . . . . .	36

Lesson 6	Deformation Behavior of Plastics. . . . .	37
	6.1 Behavior of Thermoplastics . . . . .	38
	6.2 Amorphous Thermoplastics. . . . .	39
	6.3 Semicrystalline Thermoplastics . . . . .	40
	6.4 Behavior of Cross-linked Plastics. . . . .	42
	Review Questions . . . . .	44
Lesson 7	Time-Dependent Behavior of Plastics. . . . .	45
	7.1 Load-bearing Behavior of Plastics . . . . .	46
	7.2 Effects of Time on Mechanical Behavior. . . . .	47
	7.3 Recovery Behavior of Thermoplastics. . . . .	48
	7.4 Dependence of Plastics on Time and Temperature . . . . .	49
	Review Questions . . . . .	52
Lesson 8	Physical Properties . . . . .	53
	8.1 Density . . . . .	54
	8.2 Thermal Conductivity . . . . .	55
	8.3 Electrical Conductivity. . . . .	56
	8.4 Transparency . . . . .	57
	8.5 Characteristic Material Values . . . . .	58
	Review Questions . . . . .	60
Lesson 9	Plastics Fabrication and Processing . . . . .	61
	9.1 Methods of Fabrication and Processing. . . . .	62
	9.2 Methods for Shaping Thermoplastics . . . . .	63
	Review Questions . . . . .	64
Lesson 10	Plastics Compounding . . . . .	65
	10.1 Overview . . . . .	66
	10.2 Additives and Metering . . . . .	66
	10.3 Mixing . . . . .	67
	10.4 Plasticizing. . . . .	69
	10.5 Pelletizing . . . . .	70
	10.6 Size reduction. . . . .	71
	Review Questions . . . . .	72
Lesson 11	Extrusion. . . . .	73
	11.1 Introduction . . . . .	74
	11.2 Extrusion Equipment . . . . .	74
	11.3 Coextrusion . . . . .	81
	11.4 Extrusion Blow Molding. . . . .	82
	Review Questions . . . . .	84

---

Lesson 12	Injection Molding . . . . .	85
	12.1 Introduction. . . . .	86
	12.2 Injection Molding Machine . . . . .	87
	12.3 Mold . . . . .	90
	12.4 Process Sequence . . . . .	92
	12.5 Injection Molding of Thermosets and Elastomers. . . . .	95
	Review Questions . . . . .	96
Lesson 13	Fiber-Reinforced Plastics. . . . .	97
	13.1 Materials . . . . .	98
	13.2 Process Sequence . . . . .	100
	13.3 Manual Processing Methods. . . . .	101
	13.4 Automated Processing Methods . . . . .	102
	Review Questions . . . . .	106
Lesson 14	Plastic Foams . . . . .	107
	14.1 Properties of Foams . . . . .	108
	14.2 Foam Production . . . . .	111
	Review Questions . . . . .	114
Lesson 15	Thermoforming . . . . .	115
	15.1 Fundamentals . . . . .	116
	15.2 Process Steps. . . . .	116
	15.3 Technical Equipment. . . . .	118
	Review Questions . . . . .	120
Lesson 16	Welding Plastics . . . . .	121
	16.1 Fundamentals . . . . .	122
	16.2 Process Steps. . . . .	122
	16.3 Welding Methods . . . . .	123
	Review Questions . . . . .	128
Lesson 17	Machining Plastics . . . . .	129
	17.1 Fundamentals . . . . .	130
	17.2 Technical Processes . . . . .	130
	Review Questions . . . . .	134
Lesson 18	Adhesive Bonding of Plastics . . . . .	135
	18.1 Fundamentals . . . . .	136
	18.2 Classification of Adhesives . . . . .	139
	18.3 Cementing Procedure . . . . .	140
	Review Questions . . . . .	142

---

## Contents

---

Lesson 19	Plastics Products and Plastics Waste. . . . .	143
	19.1 Discussion of Plastics Wastes . . . . .	144
	19.2 Plastics in Production and Processing . . . . .	144
	19.3 Plastics Products and Their Life Expectancies . . . . .	145
	19.4 Waste Reduction and Utilization . . . . .	147
	Review Questions . . . . .	148
Lesson 20	Recycling Plastics . . . . .	149
	20.1 Recycling of Plastics . . . . .	150
	20.2 Mechanical Recycling . . . . .	150
	20.3 Feedstock Recycling . . . . .	153
	20.4 Energy Recovery . . . . .	154
	Review Questions . . . . .	156
Appendix I	Glossary of Plastics Technology . . . . .	157
Appendix II	Selected Literature . . . . .	163
Appendix III	Example of a Training Program for Plastics Processing Operators in the US. . . . .	167
	Answers to Review Questions . . . . .	179
