# Contents

<b>Preface</b> .....	IX
<b>1 Introduction</b> .....	1
1.1 General Aspects of Hot Runner Technology .....	1
1.2 Design of Hot Runner Systems and Nomenclature of Components .....	6
1.3 Design of Single Components Used for Hot Runner Systems ..	7
<b>2 Basic Aspects of Heat Technology</b> .....	9
2.1 Heat Transfer .....	10
2.1.1 Heat Conduction .....	10
2.1.2 Convection .....	16
2.1.3 Radiation .....	19
2.1.4 Summary .....	23
2.2 Amount of Heat, Heating Capacity .....	24
2.3 Heat Expansion .....	26
<b>3 Introduction of Hot Runner Components</b> .....	37
3.1 Hot Runner Manifold Block .....	37
3.1.1 Externally Heated Hot Runner Manifold Blocks .....	41
3.1.2 Internally Heated Hot Runner Manifold Blocks .....	46
3.1.3 Insulated Runner System .....	49
3.1.4 Rheological Design .....	52
3.1.4.1 Natural Balancing .....	52
3.1.4.2 Numerical Balancing .....	54
3.2 Reflector- and Thermal Insulating Sheets, Surface Coating ....	56
3.3 Melt Chamber Bushing .....	61
3.4 Distributor Bushing .....	63
3.5 Spacer Disks .....	66
3.6 Anti-Twist Device for Hot Runner Block .....	78
3.7 Turn Plugs .....	79
3.8 Hot Runner Nozzles .....	82
3.8.1 General Aspects .....	82
3.8.2 Open Hot Runner Nozzle .....	83
3.8.3 Open Multiple Gate Nozzles .....	89
3.8.3.1 “Vertical” of Nozzle Tip Design .....	89

3.8.3.2	“Slanted” Design of Nozzle Tips	99
3.8.3.3	“Horizontal” Tip Design	101
3.8.3.4	“Edge” Gating without Tips	104
3.8.4	Shut-Off Nozzles	107
3.8.4.1	Needle Shut-Off Systems	108
3.8.4.2	Thermal Shut-Off-Nozzles	140
<b>4</b>	<b>Heating of Hot Runner Manifold Blocks</b>	<b>147</b>
4.1	Cylindrical Cartridge Heater	148
4.2	Tapered Cartridge Heater	150
4.3	Threaded Cartridge Heater	151
4.4	Tubular Heater	152
4.5	Heater Plate	155
4.6	“Thick-Film”- Heating Element	157
4.7	Indirect Heating Using a Liquid Medium	158
4.8	Heat Pipe	159
4.9	Determination of Heating Capacity of an Externally Heated Hot Runner Manifold Block	160
4.9.1	Estimate of Required Heating Capacity	160
4.9.2	Numerical Determination of Heating Capacity to be Installed for the Heat-up Phase	161
<b>5</b>	<b>Heating of Hot Runner Nozzles</b>	<b>165</b>
5.1	Cylindrical Cartridge Heater	165
5.2	Coiled Heater	166
5.3	Resistor Heater	170
5.4	Heat Pipe	173
5.5	Indirect Heating Using a Liquid Medium	174
5.6	General Remarks Regarding Internal Heating (“Conductive Heating”)	177
5.7	Indirect Heating	181
5.7.1	Thermally Conductive Torpedoes	181
5.7.2	Thermally Conductive Nozzle	186
<b>6</b>	<b>Measurement and Control of Temperature</b>	<b>193</b>
<b>7</b>	<b>Material Behavior under Mechanical Load</b>	<b>195</b>
7.1	Notch Effect under Static Load	195
7.2	Notch Effect under Dynamic Load	198

<b>8</b>	<b>Corrosion and Wear</b> .....	201
<b>9</b>	<b>Screw Connections and Material Selection for Elevated Temperatures</b> .....	207
<b>10</b>	<b>Basic Aspects of Plastics Technology</b> .....	211
10.1	Flow Characteristics, Viscosity, Pressure Loss .....	211
10.2	Thermal Stability .....	215
10.3	Decrease of Molecular Weight (Exemplified by PBT) .....	217
10.3.1	Thermal Degradation .....	217
10.3.2	Mechanical Degradation .....	219
10.3.3	Oxidative Degradation .....	219
10.3.4	Hydrolytic Degradation .....	220
<b>11</b>	<b>Maintenance and Storage of Hot Runner Molds</b> .....	221
<b>12</b>	<b>Design of Special Hot Runner Systems and Hot Runner Molds</b> ..	223
12.1	300-Fold Hot Runner System for the Production of Transistor Housings Made of Reinforced PBT .....	223
12.2	Hot Runner Manifold Block for Sandwich Molding .....	226
12.3	Hot Runner System with Balanced Filling Action .....	228
12.4	Hot Runner Nozzles for Small Center-to-Center Cavity Space .	229
<b>Appendix 1:</b>		
	<b>Abbreviations Used in this Book</b> .....	233
<b>Appendix 2:</b>		
	<b>Conversion Factors for Units of Measure</b> .....	235
	<b>Index</b> .....	239
